## About VUETRADE

VUETRADE delivers Innovative, Quality and Timesaving Timber Connectors & Building Materials to the building industry. VUETRADE products are developed and distributed across Australia and New Zealand by Bellevue Group Australasia, a wholly Australian owned manufacturer and supplier with many years' experience in the building industry. Bellevue Group Australasia | VUETRADE have a solid history and reputation for providing quality service and products. Our understanding and providing for our customer's needs comes from a long association with the building industry, and a network of retail and trade outlets stocking our range of products.

We strive to have as many products as possible made in Australia and New Zealand. This commitment is born of two logics; we have a belief in the quality of product made locally for Australia and New Zealand conditions, and a committal to supporting jobs here in the region.

### FREIGHT & DELIVERY

We endeavour to provide same day despatch for all orders placed before 12:00 noon.

FIS ALL ORDERS OVER \$750.00

Orders below this value – \$50.00 Freight (Prices/ Order Value Excludes GST)

RESTOCKING FEE – 20% of invoice price

SPECIAL ORDERS – We do not provide returns on special orders, please check the detail of the order before placing it.

### QUALITY & COMPLIANCE

VUETRADE products are tested in house for compliance, development, and quality control. We are committed to supplying quality products in full compliance with Australian and New Zealand standards.

### BECOME A PLATINUM PARTNER

VUETRADE Platinum Partner Program is a reward to our customers for loyalty to our products. Benefits go beyond the benefits of stocking our products and include:

- Instore Signage
- Enhanced Marketing
- Timber Connectors Discount
- Website Enquiries directed to your store
- 1 FIS order of any value for those one off occasions.
- Store of the Month

See our website or the VUETRADE Platinum Partner Flyer for full details on this program.

## Timber Connector Icons

To assist with proper product specification and use for different areas VUETRADE have developed a unique and easy to understand icon markings for our Timber Connectors range.

### G – Standard/Galvanised

- Internal/enclosed
- Exterior/exposed inland areas except if in contact with fresh water or non-saline wetting & drying

### Rain Drop – Marine Environment

- Marine Environment 100m up to 1km from a non-surf coast and from 1km up to 10km from a surf coast
- External applications in contact with freshwater or subject to non-saline wetting and drying (classed as Marine Environment as per AS 3700 – 2011: Section 5: Design for Durability)
- Minimum steel grade required Stainless Steel 304

### Waves – Severe Marine

- Severe Marine 100m from a non-surf coast and up to 1km from a surf coast
- Minimum Steel Grade Stainless Steel 316
- No 'Tea Staining' a superficial 'rust' look that occurs on lower grades of Stainless Steel including 304.

### Cyclonic

- Products designed specifically for use in cyclonic regions
- Range includes both Galvanised and Stainless Steel options

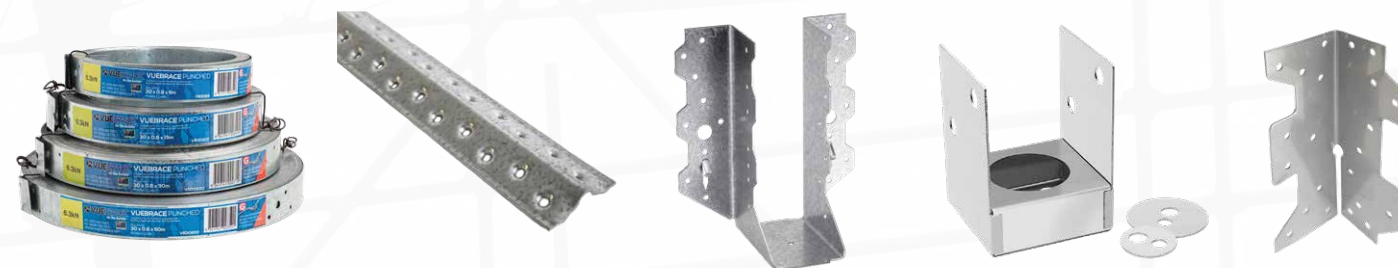

Product sizes and box quantities may change without notice, please check our website for up to date information.

## Australian Made

VUETRADE are very proud to offer a comprehensive range of Australian Made products. Working closely with Australian Made, VUETRADE are constantly looking to develop and increase the range available to our customers.

Supplying Australian Made products offers many benefits including:

- **Product availability** – A heavy reliance on imports can lead to serious issues with inconsistent supply over the medium to long term. Turbulent world events can lead to external factors beyond control negatively affecting overseas supply. A healthy Australian Made product range ensures a regular supply of materials and product in stock.
- **Quality** – Manufacturing in Australia allows for a better understanding of manufacturing processes and the quality control measures in place during the process. Overseas manufacturers can find it difficult to comply with the relevant Australian standards.
- **Supporting the Australian Economy** – At VUETRADE we want to do our part to support the Australian Economy and Aussie jobs. Increasing our Australian Made product range in the future will continue VUETRADE's goal of growing helping to drive the economy forward.

## Environmental Focus

**Did you know that Australia's native and plantation forests store around 22 billion tonnes of carbon?**

At VUETRADE we are focused on doing our part to help drive positive change within the manufacturing and construction sectors. Through our dedication to providing innovative new products offering process improvement and increased efficiency for timber frame construction methods, we can support the use of sustainable forest management practices which generate the largest climate change mitigation benefits possible within manufacturing and construction.

Australia has around 134 million hectares of forest that clean our air and supply wood for our timber building products. Wood products also connect us to nature, making us feel happier and more relaxed.

Trees also have the incredible ability to:

- Produce the oxygen that we breathe
- Regenerate and regrow
- Absorb carbon dioxide from the atmosphere and store this within the fiber of the tree
- Store carbon when used in buildings, furniture, or other long-lasting wood products

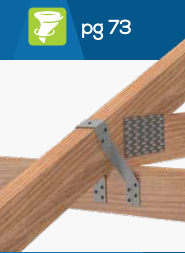

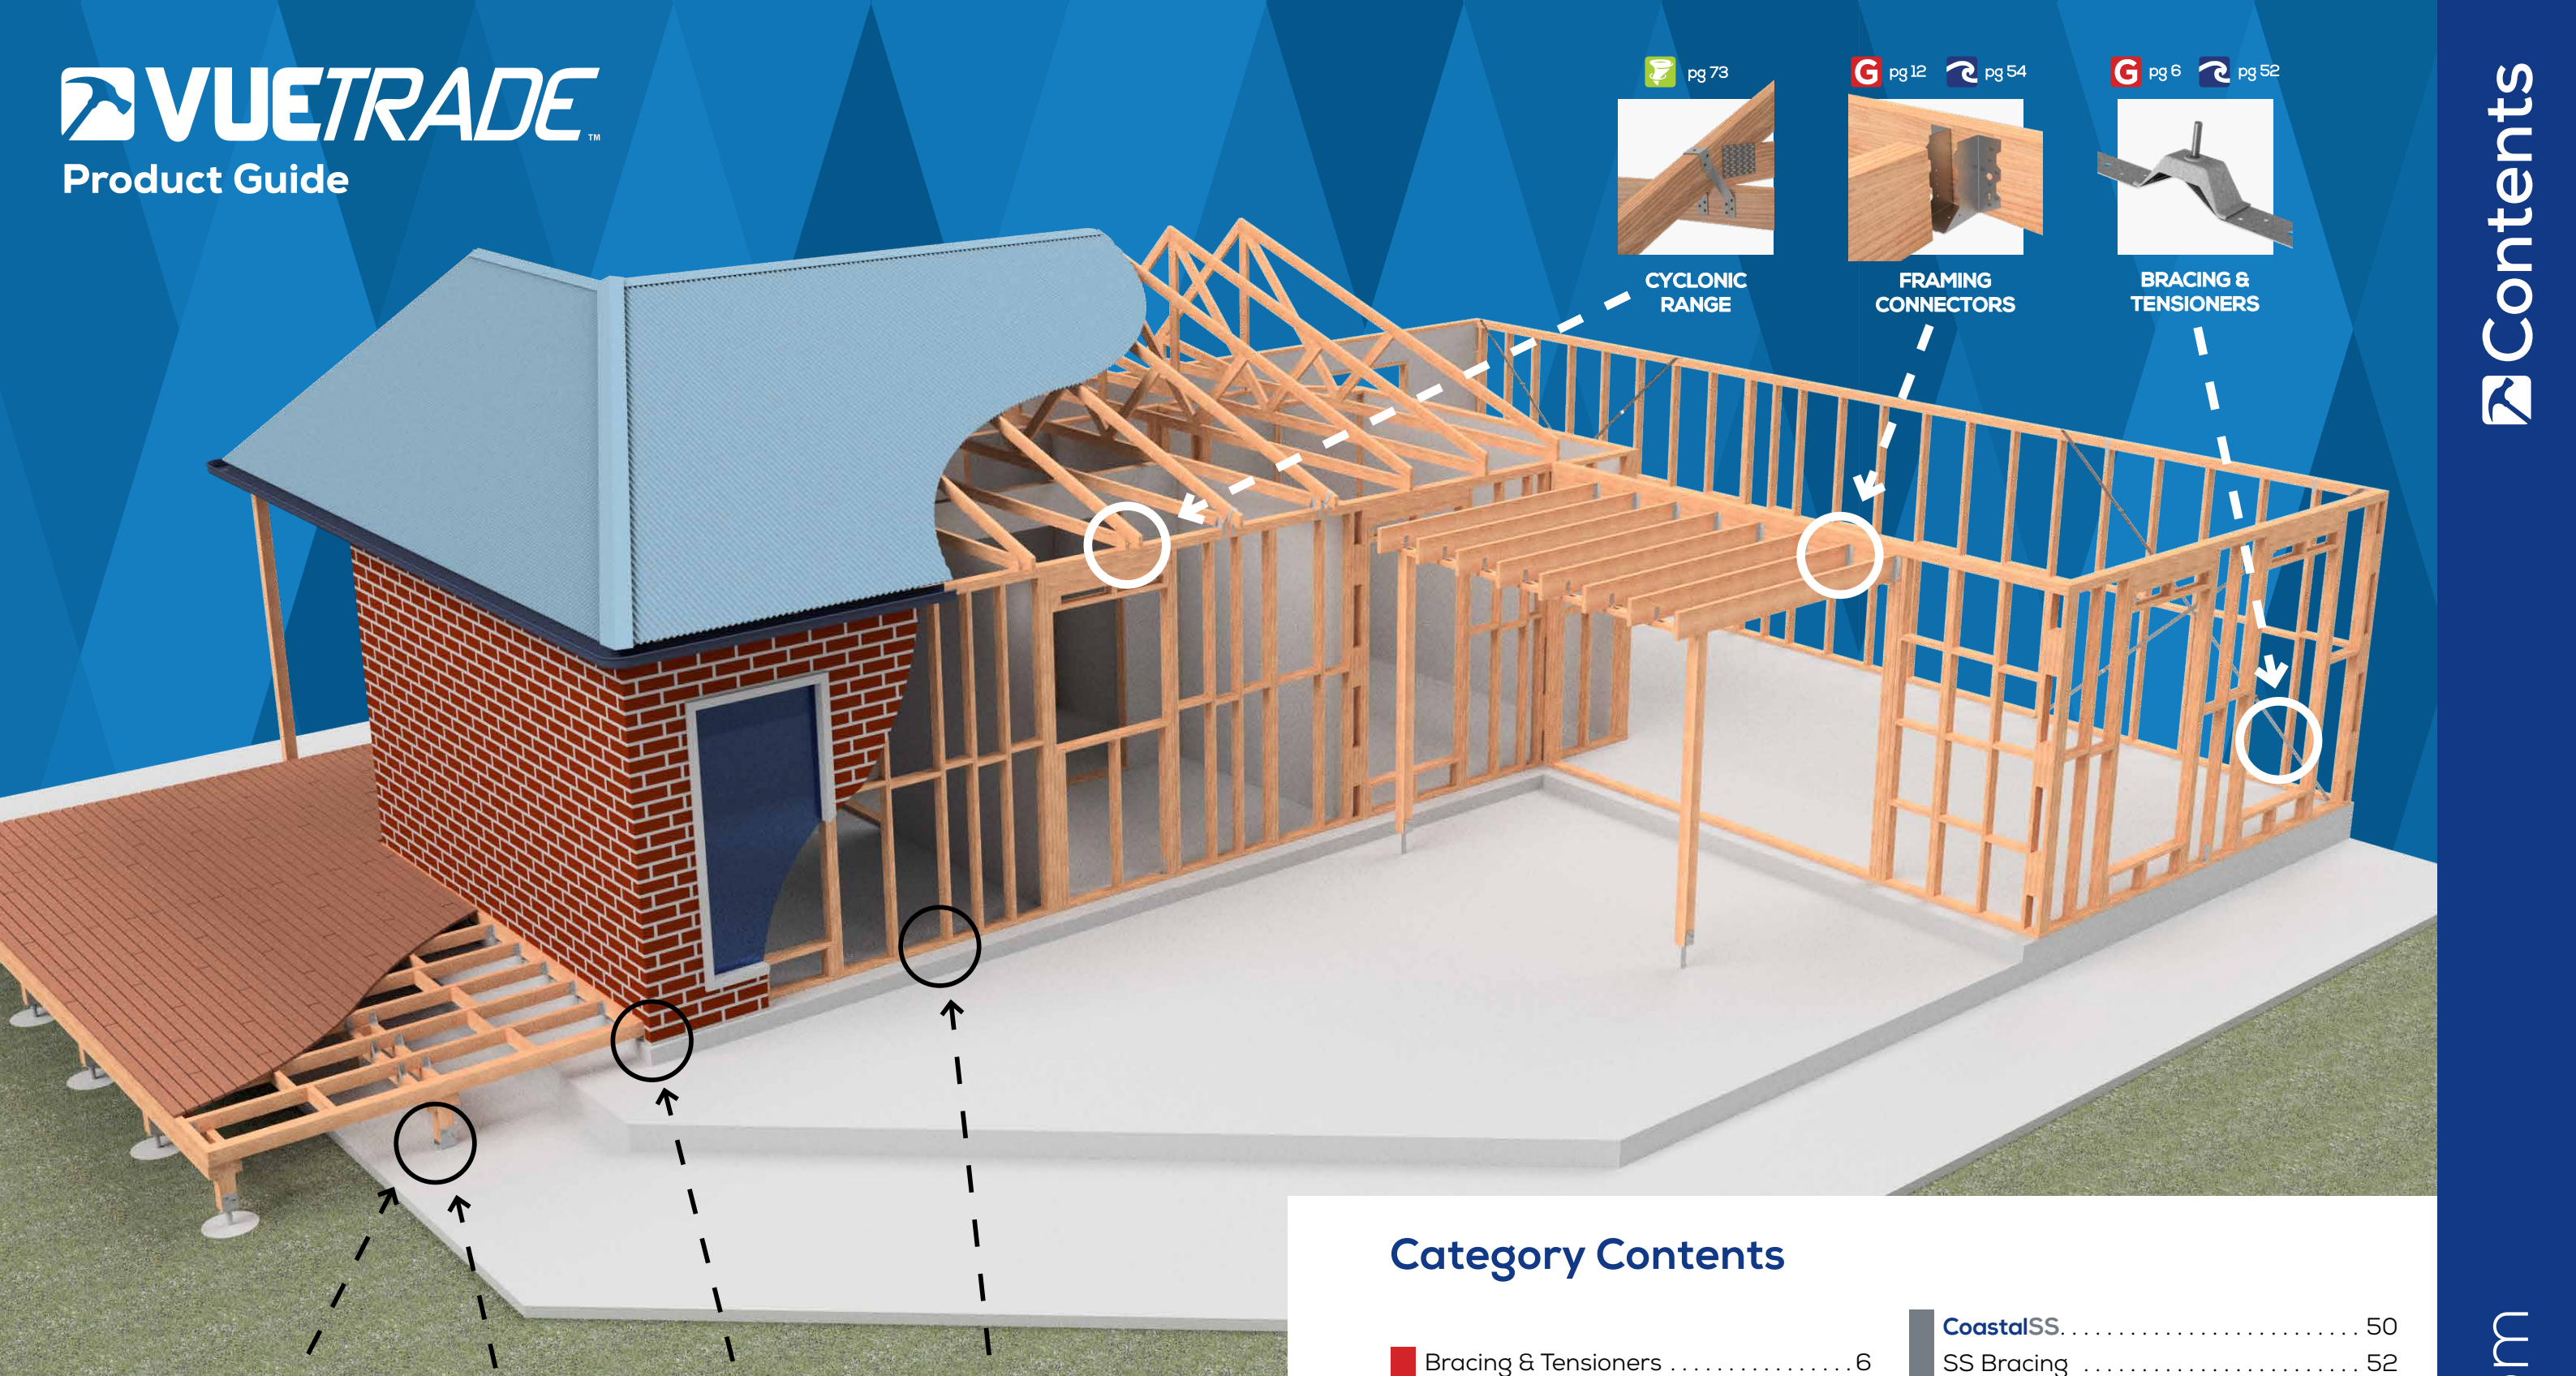

Nature provides us with a sophisticated alternative to other materials that use more carbon in their production. The forestry industry in Australia is sustainable, making wood truly the ultimate renewable resource. With the use of VUETRADE connectors, timbers can quickly and securely be joined together to create a carbon positive building system that becomes a Home of the future!

The builder's first choice.

VUEBRACE Light Duty Strapping

VUEBRACE Light Duty Strapping is a galvanised tension bracing for use in light duty applications where there are no heavy loads or wind uplifts to bear.

- Suitable for light duty applications
- Suits VUESMART Brace Tensioner
- Two sizes available:
  - 25mm wide x 0.6mm thickness
  - 25mm wide x 0.8mm thickness
- Available in 6m, 15m and 30m Coils
- Galvanised finish for durability and long-life
- Australian Made - High quality, peace of mind, and supporting Aussie jobs

**Warning:** 25mm x 0.6mm and 25mm x 0.8mm Strapping is categorised as Light Duty Strapping and should not be used in load bearing or structural applications affected by wind uplift.

# T-BLADE

## POST SUPPORT SYSTEM

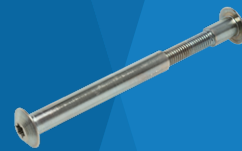

Suits 90 to 360mm timber posts

T-Blade

T-Blade Cap

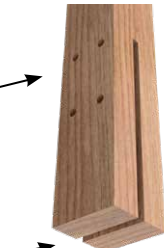

VUEBOLT

### INSTALLATION INSTRUCTIONS:

1.

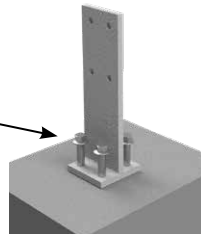

Drill appropriate Ø holes in timber to fit bolts

Cut a 10mm slit in the middle of timber to height

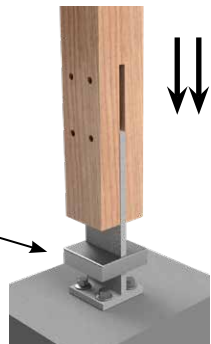

2.

Install 4x appropriate sized concrete bolts or equivalent to ground

3.

Slide timber to T-Blade

Place a T-Blade cap to conceal concrete bolts

4.

Install 4x VUEBOLT

T-Blade Post Supports With Leg

VUETRADE T-Blade Post Supports with Legs are strong, solid connectors ideal for fixing timber posts, by bolting onto or setting into concrete.

- Ideal for specialty timber posts
- 10.0mm thick steel blade and base
- 35mm or 73mm diameter legs
- NEW – Solid 35mm Legs in 300mm & 600mm long – 140mm x 140mm Saddle Size only
- Concealed welds between vertical and horizontal plates
- Galvanised finish for durability and long-life

Also available in Stainless Steel. See page 66.

Ant Caps

VUETRADE Ant Caps are galvanised steel caps ideal for inserting between timber bases and floors in areas with termite activity.

- Suited for termite-prone areas
- Shows termite mud tunnels in inspections
- Galvanised finish for durability and long-life
- Made in Australia

**Warning:** These Ant Caps will not prevent the passage of ants/ termites. Contact your local inspectors or council authorities for inspection requirements and recommendations.

Also available in Stainless Steel. See page 69.

Brick Veneer Ties - Light Duty

VUETRADE Brick Veneer Ties Light Duty are masonry wall ties ideal for joining wall frames and brickwork to provide stability in light duty applications.

- Classified Light Duty when used with the accompanying Nails
- Conforms to Australian Standards AS2699 and AS3700
- Available in R2 (Galvanised), R3 (SS304), R4 (SS316)
- 0.9mm thick steel for extra strength
- Made in Australia

**Warning:** R2 Brick Ties are to be used no closer than 10km to surf coast, or 1km to sheltered coast. R3 Brick Ties are to be used 1km – 10km from surf coast, or 100mt – 1km from sheltered coast. R4 Brick ties are to be used within 3km of coastal or industrial areas. Refer to AS2699.1:2020

Also available in Stainless Steel. See page 70.

Brick Veneer Ties - Medium Duty

VUETRADE Brick Veneer Ties Medium Duty are masonry wall ties ideal for joining wall frames and brickwork, providing stability to the brickwork in medium duty applications.

- Medium Duty classification when used with the accompanying Screws
- Fully tested and compliant with Australian Standards AS2699 and AS3700
- Available in R2 (Galvanised), R3 (SS304), R4 (SS316)
- 0.9mm thick steel for extra strength
- Made in Australia

**Warning:** R2 Brick Ties are to be used no closer than 10km to surf coast, or 1km to sheltered coast. R3 Brick Ties are to be used 1km – 10km from surf coast, or 100mt – 1km from sheltered coast. R4 Brick ties are to be used within 3km of coastal or industrial areas. Refer to AS2699.1:2020

Twisted Brick Veneer Ties

VUETRADE Twisted Brick Veneer Ties are galvanised steel masonry wall ties for fixing brick work to the side of timber framing rather than the face.

- Side-fixing wall tie – connects to timber stud
- Install during masonry construction
- Conforms to Australian Standards AS2699 and AS3700
- 115mm in length
- Galvanised finish for durability and long-life
- Made in Australia

Product Guide

## VUEBOLT Post Support Bolts

Referred to as **the post support bolt**, the VUEBOLT truly shines in its ease of use and clean, concealed finish when being used to secure a timber post.

VUEBOLT

90 to 360 mm

Full VUEBOLT  
Sizes Range

M10 / M12 /  
M16 / M20

Bolt Sizes

T50 Star Drive

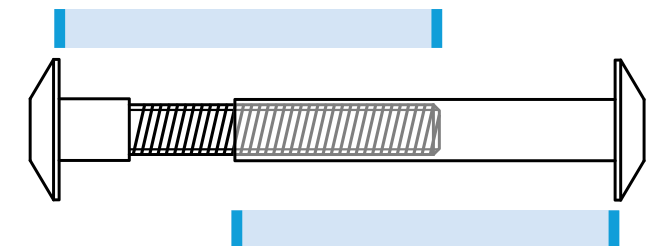

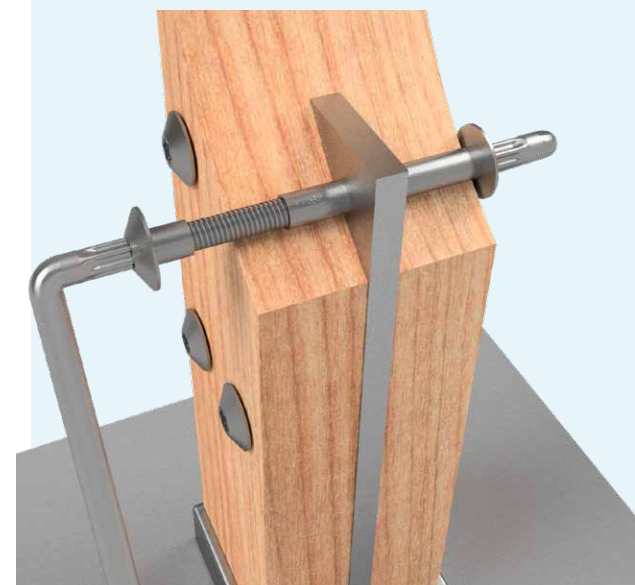

Secures all sizes  
of the VUEBOLT

Concealed thread bolts  
ideal for fixing post  
supports or for timber to  
timber connections

FOR VUEBOLT VIDEO:

vuetrade.com

Designed to have **equal length sides** on  
both male and female ends to ensure  
a strong connection

### SIZE CHART:

M10 x 90 - 110 mm

M12 x 90 - 110 mm

M12 x 110 - 150 mm

M16 x 110 - 150 mm

M16 x 150 - 230 mm

M20 x 230 - 360 mm

Check out our **online chart** to see which  
size VUEBOLT suits your post support.

VUEBOLT Post Support Bolts

**VUEBOLT Post Support Bolts** are concealed thread bolts ideal for fixing post supports with a quick, neat and concealed finish.

- Concealed thread with male and female bolt – neat finish
- Easy installation with T50 drive head
- Strong, compliant and durable
- Excellent corrosion protection

**Warning:** Always ensure that boltholes are drilled fully through the timber post to obtain the recommended capacity.

Stainless Steel VUEBOLT Post Support Bolts

**Stainless Steel VUEBOLT Post Support Bolts** are concealed thread bolts ideal for coastal construction, providing a quick, neat finish on feature timber posts.

- Concealed thread, male & female bolts – neat finish
- Simple to install with T50 drive head
- Compliant to Australian Standards AS1684.2 and AS1720
- 316 Stainless Steel – durable, corrosion resistant, and suitable for use in coastal or high corrosion environments

**Warning:** Always ensure that bolt holes are drilled fully through the timber post to obtain the recommended capacity. Mandatory and recommended usage of stainless steel timber connectors varies in different states and areas – always check with your local building authorities. VUETRADE CoastalSS stainless steel brackets should always be used with Stainless Steel fixings.

# COASTALSS

for coastal & high corrosion areas

- CoastalSS is recommended for corrosion resistance
- Stainless Steel use is specified in the Australian Standards
- 316SS provides the strongest corrosion protection
- Timber Connector Icons assist specification

VUETRADE's CoastalSS range is made up of high-quality Stainless Steel products that allow you to install solid timber connections in various coastal areas, without having to worry about the connector rusting and making your structure unsafe.

Stainless Steel Timber Connectors prevent potential structural failure, as well as saving the future time and money required to replace corroded brackets.

The Australian Standards provide guidelines for the use of Stainless Steel Fixings and Brackets – refer to AS3700 Section 5.

VUETRADE has an extensive stocked range of 304 and 316 Stainless Steel, as well as many special order and customizable Stainless Steel products.

**Stainless Steel grade 304** (SS304) is the most commonly used stainless steel, as it is cost effective and sufficiently corrosion resistant for many applications. However, SS304 is susceptible to tea staining (a superficial rust-looking stain) and can be corroded in extremely corrosive environments.

In contrast, **Stainless Steel grade 316** (SS316) has a greatly increased corrosion resistance and will withstand Severe Marine conditions.

## Timber Connector Specification Area Chart

### Timber Connector Icons

To assist with proper product specification and use for different areas VUETRADE have developed a unique and easy to understand icon markings for our Timber Connectors range.

#### G – Standard/Galvanised

- Internal/enclosed
- Exterior/exposed inland areas except if in contact with fresh water or non-saline wetting & drying

#### Rain Drop – Marine Environment

- Marine Environment – 100m up to 1km from a non-surf coast and from 1km up to 10km from a surf coast
- External applications in contact with freshwater or subject to non-saline wetting and drying (classed as Marine Environment as per AS 3700 – 2011: Section 5: Design for Durability)
- Minimum steel grade required Stainless Steel 304

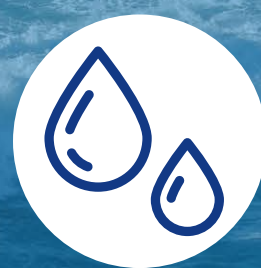

#### Waves – Severe Marine

- Severe Marine – 100m from a non-surf coast and up to 1km from a surf coast
- Minimum Steel Grade Stainless Steel 316
- No 'Tea Staining' a superficial 'rust' look that occurs on lower grades of Stainless Steel including 304.

#### Coastal

SS304 and SS316 are suitable for use on the coast, to prevent corrosion and its structural consequences.

#### Marine

Severe Marine environments require genuine SS316 products for greatest corrosion resistance and safety.

#### Pools

CoastalSS uses include the area surrounding fresh-water and salt-water pools – make sure your pool decking is safe!

All products are tested following procedures highlighted in AS 1720. VUETRADE products are compliant to AS 1684.

Stainless Steel Threaded Rod

VUETRADE Stainless Steel Threaded Rod is a timber connector ideal for tie down applications, especially in tying down roof trusses in cyclone-prone regions. Also can be used for general tie down and bracing for wall framing.

- Ideal for cyclonic and high wind areas
- Available in diameters ranging from M10 to M20
- Complies with Australian Standards AS1275/DIN975 and AS1684.2
- 316 Stainless Steel – durable, corrosion resistant, and suitable for use in coastal or high corrosion environments

Suitable for  Cyclonic installations.

Stainless Steel Ant Caps

VUETRADE Stainless Steel Ant Caps are caps ideal for covering timber bases to show termite activity in coastal areas.

- Suited for termite-prone & coastal areas
- Make termite inspections easier
- 100mm x 100mm with 25mm Flange
- 316 Stainless Steel – durable, corrosion resistant, and suitable for use in coastal or high corrosion environments

**Warning:** These Ant Caps will not prevent the passage of ants/ termites. Contact your local inspectors or council authorities for inspection requirements and recommendations. Mandatory and recommended usage of stainless steel timber connectors varies in different states and areas – always check with your local building authorities.

Brick Veneer Ties - R3

VUETRADE Brick Veneer Ties R3 are stainless steel masonry wall ties ideal for coastal areas, providing stability to brickwork by joining it to wall frames.

- Durability class R3 - 304 Stainless Steel
- 0.9mm thick steel
- Fully tested and compliant with Australian Standards AS2699 and AS3700
- Made in Australia

**Warning:** R3 Brick Ties are to be used 1km - 10km from surf coast, or 100mt - 1km from sheltered coast. Refer to AS 2699.1-2020. Mandatory and recommended usage of stainless steel timber connectors varies in different states and areas - always check with your local building authorities.

Brick Veneer Ties - R4

VUETRADE Brick Veneer Ties R4 are stainless steel masonry wall ties ideal for coastal areas, joining wall frames and brickwork to provide structural stability.

- Conforms to Australian Standards AS2699 and AS3700
- Durability class R4 - 316 Stainless Steel
- 0.9mm thick stainless steel
- Light Duty with Nails and Medium Duty with Screws available
- Made in Australia

**Warning:** R4 Brick ties are to be used within 3km of coastal or industrial areas. Refer to AS 2699.1-2020. Mandatory and recommended usage of stainless steel timber connectors varies in different states and areas - always check with your local building authorities.

Stainless Steel Double Sleeve Expansion Ties

VUETRADE Stainless Steel Double Sleeve Expansion Ties are rod ties ideal for preventing masonry cracking in coastal areas.

- Sliding rod tie for vertical expansion joints
- Conforming with Australian Standards AS2699 and AS3700
- 316 Stainless Steel - durable, corrosion resistant, and suitable for use in coastal or high corrosion environments

**Warning:** Mandatory and recommended usage of stainless steel timber connectors varies in different states and areas - always check with your local building authorities.

Stainless Steel Sub Floor Vents

VUETRADE Stainless Steel Sub Floor Punched Vents are brick vents designed to allow air movement in sub floors and prevent moisture damage on buildings.

- Complies with NCC 2022 for subfloor ventilation
- Install when mortaring brickwork or blockwork
- Combats sub floor moisture and provides sufficient airflow
- 316 Stainless Steel – durable, corrosion resistant, and suitable for use in coastal or high corrosion environments
- Made in Australia

VTSFV230X76SS	STAIN. STEEL SUB FLOOR VENTS - 230 x 76 - PUNCHED GRID	20		

Stainless Steel Sub Floor Vents Anti-Spark

VUETRADE Stainless Steel Sub Floor Vents – Anti Spark are brick vents fitted with fine stainless steel mesh, designed to combat sub floor moisture, ideal for areas which are prone to bushfire attack up to and including BAL-40.

- Insert into the wall when the bricks/blocks are being laid
- Combats sub floor moisture and provides sufficient airflow
- Fitted with BAL40 compliant (complies with Australian Standard AS3659: 2009 – ‘Construction of Building in Bush fire-prone Areas’) Anti-Spark 316 Stainless Steel Mesh 0.9mm diameter x 1.64mm aperture for bushfire zones
- 316 Stainless Steel – durable, corrosion resistant, and suitable for use in coastal or high corrosion environments
- Made in Australia

Cyclonic Post Supports

VUETRADE Cyclonic Post Supports are U shaped anchors ideal for fixing timber posts in cyclonic or high wind areas.

- Ideal for cyclonic and high wind areas
- Designed for use with 12mm bolts as required in Queensland
- Bolt Holes – 14mm Diameter, M12 size
- Hot dipped galvanised for long life
- 6.00mm thick steel for extra strength
- Conforms with Australian Standards AS1684.2 and AS1684.3
- Galvanised finish for durability and long-life

Also available in Stainless Steel. See page 67.

Threaded Rod

VUETRADE Threaded Rod is a timber connector ideal for tying down roof trusses in cyclone-prone regions.

- Ideal for cyclonic and high wind areas
- Available in diameters ranging from M10 to M20
- Complies with Australian Standards AS1275/DIN975 and AS1684.2
- Grade 4.6 - mild steel
- Galvanised finish for durability and long-life

Also available in  Stainless Steel. See page 69.

## Product Testing

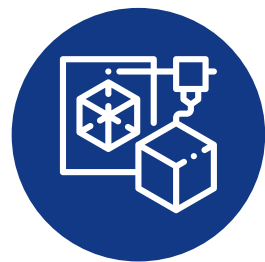

At VUETRADE, we have our own product testing facility, run by our in-house engineer.

This facility speeds up product development and allows us to continually test our products to ensure we're delivering consistent quality and provide reliable technical data.

Technical data sheets are available for each product through our website [vuetrade.com](http://vuetrade.com)

All product tests are run according to the relevant Australian Standards, on our MTS-SAN Universal Tensile Testing Machine. This machine is calibrated regularly according to NATA requirements, and allows us to confidently provide reliable technical data for all our customers through regular testing.

New and updated VUETRADE products are tested by our technical team to make sure each product meets the required standards and is safe for public use.

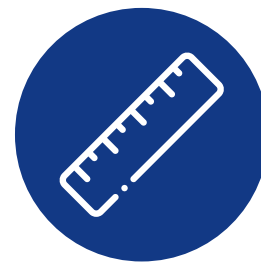

### Design

Product testing ensures that the engineered products have optimum strength & quality.

### Technical

Our facility produces technical information for your use during installation & inspections.

### Compliance

Our technical team tests our product compliance, and raises awareness about compliance issues.

## In-Store Merchandising

Along with our innovation and product quality, VUETRADE's in-store merchandising offering has always been a main point of difference.

Many of our current stockists cite our merchandising as a tipping point in the decision-making around stocking the VUETRADE range.

Our merchandising offer comprises effective and aesthetic carton design, pre-planned on-shelf organisation, and the unique and complete product offering included.

VUETRADE's cartons have been carefully designed to ship, stock and display well.

The consistent carton size is not just convenient for a neat shelf; the widths were specifically designed to suit both common shelf sizes.  
900mm shelf = 5 cartons & 1200mm shelf = 7 cartons.

Another key point in VUETRADE's in-store solution is the merchandising planograms designed and put into place by our helpful sales team.

VUETRADE has a complete range of Timber Connector products, adaptable to your specific needs and customers, which includes some of the most innovative products in the industry: our Value Add range.

### Carton Design

Our cartons are consistently and effectively sized, as well as being high-gloss for an aesthetic on-shelf look.

### Planograms

Our small, medium & large plans enable every store size to easily implement neat, convenient on-shelf organisation.

### Product Range

VUETRADE's product offering is a complete solution to your needs and easily the most innovative range available!

Product Guide

Disclaimer

All instructions detailed in Technical Data reports must be followed carefully. Modification of a VUETRADE Timber Connector or installation other than by the suggested instructions runs the risk of a non-compliant installation.

Ensure the fasteners specified in the relevant Technical Data for each VUETRADE Timber Connector are installed in accordance to any requirements set out in the Technical Data. This includes but is not limited to fastener sizes, numbers of fasteners, and corrosion protection requirements. Incorrect fixings or product placement, including misinterpretation of Timber Species with recommended joint groups, may result in failed and/or non-compliant connections.

Before installing a product, refer to the Technical Data detailed on the website [www.vuetrade.com](http://www.vuetrade.com). Under no circumstances are powered or pneumatic driven tools to be used for fixing VUETRADE Timber Connector products, neither are screws deemed an alternative unless detailed clearly in the Technical Data.

Any of the above detailed changes will affect the final install's Load Capacity, which is set out in the VUETRADE product documentation. In cases where fasteners have been substituted for similar products, VUETRADE Timber Connectors are at risk of having weakened characteristic capacities and non-compliant connection/s, which may affect the overall product integrity.

Ensure that VUETRADE products are fully fastened with VUETRADE recommended fasteners before loading the given connection/s. VUETRADE will not guarantee or stand by details set out in the Technical Data should products be modified, incorrectly installed or any of the above requirements not met as made clear in the Technical Data. VUETRADE will not be held responsible for product failure in these circumstances.
