

T50 STAR DRIVE WRENCH

JAN26

APPLICATION

The VUEBOLT T50 Star Drive Wrench is the ideal solution for the fast and effective installation of VUEBOLT Concealed Thread Bolts. These bolts are ideally suited for use with post supports, on timber connections, and where a high-quality finish is desired on both sides on the timber.

SPECIFICATION

The VUEBOLT T50 Star Drive Wrench is manufactured from tool-grade Cr-V steel and has a T50 head on both ends for suitability to install VUEBOLTS and other T50 bolts.

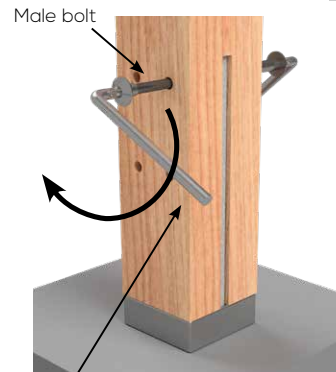

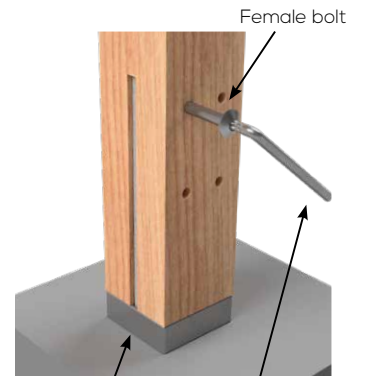

SIZES

| Product Code | Suitability | Card Qty |
|--------------|-------------------|----------|
| VTX50 | All VUEBOLT sizes | 2 |

VUEBOLT INSTALLATION GUIDE

1. Drill hole through timber as required.

2. Insert Female and Male bolts on opposite sides. If used with a VUETRADE T-Blade ensure that Female bolt has passed through the T-Blade prior to tightening.

T50 Star Drive Wrench

3. Tighten using two VUETRADE T50 star drive wrenches.

CORROSION PROTECTION

It is recommended to store the VUEBOLT T50 Star Drive Wrench in clean, dry conditions.
